V.S. HARI HARAN

+91 9342131369 | GitHub | LinkedIn | E-mail | Puducherry, India

PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience in machine learning, deep learning, and AI-driven cybersecurity. Proficient in building and deploying end-to-end ML pipelines using Python, Flask, and FastAPI. Experienced across internships in ML engineering, prompt engineering, and data analytics. Passionate about research-oriented development at the intersection of AI and cybersecurity, with strong academic performance (CGPA: 8.50/10).

EDUCATION

Bachelor of Technology – Artificial Intelligence and Data Science *2023 – Present*

Achariya College of Engineering Technology, Puducherry, India

CGPA: 8.50 / 10.00

Higher Secondary Education (Science) *2023*

Wiseman Hr. Sec. School, Puducherry, India

Percentage: 71%

TECHNICAL SKILLS

AI / ML: Machine Learning, Deep Learning, Generative AI, Prompt Engineering, Federated Learning, NLP

Cybersecurity: AI-Based Threat Detection, Malware Analysis, Ethical Hacking, Cyber Forensics, Intrusion Detection

Programming: Python, R, Bash, JavaScript, HTML/CSS

Frameworks & Deployment: Flask, FastAPI, REST API, Streamlit, Vercel, Netlify

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: AWS, Git/GitHub, VS Code, Jupyter Notebook, Google Colab, Power BI, UiPath

WORK EXPERIENCE

Machine Learning Intern | Cognify Technologies *2026*

- Built logistic regression and random forest models for diabetes prediction, achieving higher accuracy through systematic feature engineering and k-fold cross-validation.
- Preprocessed and analyzed medical datasets, reducing feature dimensionality and improving model generalization on unseen data.

Prompt Engineering Intern | Future Intern *2026*

- Engineered and deployed a production-grade AI chatbot agent using structured prompt design techniques and agent-based architecture.
- Integrated AI-generated content and video generation capabilities into a prototype e-commerce platform as part of a full-stack development pipeline.

Data Analyst Intern | RD Infro Technology *2025*

- Analyzed Swiggy's year-end operational dataset to evaluate revenue trends, customer segmentation, and KPIs across multiple business dimensions.
- Delivered structured reports and interactive dashboards with actionable insights to support data-driven decision-making.

PROJECTS

AI-Based Malware Detection System | *Domain: AI and Cybersecurity*

- Designed and implemented an ML-based malware classification system using static and behavioral feature extraction from executable files.

- Applied ensemble learning techniques and evaluated model performance against benchmark malware datasets.

AI-Based Business Intelligence Platform | *Domain: Artificial Intelligence and Machine Learning*

- Built a multi-module BI platform integrating AI-driven analytics, automated report generation, and interactive data visualization dashboards.
- Deployed using Flask and Streamlit, enabling real-time data querying and insight delivery.

AI-Powered PDF Context-Aware Chatbot (RAG System) | *Domain: Artificial Intelligence*

- Developed a Retrieval-Augmented Generation (RAG) chatbot capable of answering context-specific queries from uploaded PDF documents.
- Implemented document chunking, vector embedding, and semantic search pipeline for accurate and grounded responses.

Multi-Domain AI Resume Analyzer | *Domain: Artificial Intelligence*

- Created an intelligent resume analysis tool capable of evaluating resumes across multiple job domains using NLP and scoring heuristics.
- Provided structured feedback and keyword gap analysis to improve ATS compatibility.

AI-Based Medical Symptoms Diagnosis System | *Domain: Artificial Intelligence and Machine Learning*

- Developed a symptom-to-disease prediction system using classification models trained on structured medical datasets.
- Built a user-facing web interface using Streamlit for real-time diagnosis prediction.

Customer Segmentation using K-Means Clustering | *Domain: Data Analytics*

- Applied K-Means clustering to segment customers based on behavioral and transactional data, identifying distinct customer personas.
- Visualized cluster distributions and derived actionable marketing insights from segment profiles.

CERTIFICATIONS

- Offensive Security Certified Professional – Nativeva
- Certified Cyber Forensics Professional – Nativeva
- Security Operations Centre Learning path – TryHackMe
- AI Security – TryHackMe
- Pre-Security – TryHackMe
- Advent of Cyber 2025 – TryHackMe
- Cybersecurity & Privacy – NPTEL
- Data Analytics – FITA Academy
- Advanced Data Visualization using Power BI – GUVI HCL
- Prompt Engineering – Pantech Learning
- Automation Developer Associate Training – UiPath

ACHIEVEMENTS & ACTIVITIES

- Best Performance Award – Placement Training 2025–2026, Achariya College of Engineering Technology
- 1st Prize – Inter-School Science Exhibition, Wiseman Hr. Sec. School
- Garnishing Talent Program – Eaton Pvt. Ltd.
