PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience in AI/ML, data analytics, Power BI, prompt engineering, and cybersecurity through internships and academic projects. Skilled in Python, SQL, machine learning, LLMs, and data visualization, with practical experience developing AI-powered applications and security solutions. Seeking entry-level opportunities as an AI Engineer, Data Analyst, or SOC Analyst to apply technical skills and contribute to innovative, data-driven organizations.

TECHNICAL SKILLS

AI / ML: Machine Learning, Generative AI, Prompt Engineering, Data Analysis, Data Science, Visualization Dashboards

Cybersecurity / SOC: AI Security, Malware Analysis, Ethical Hacking, Cyber Forensics, Intrusion Detection and Prevention (IDS/IPS), SOC Monitoring, SIEM Tools (Splunk, Elastic), Threat Detection, Incident Response

Programming Languages: Python, SQL, Bash

Frameworks and Libraries: Flask, FastAPI, Streamlit, REST API, NumPy, Pandas, Matplotlib, Scikit-learn

Databases: MySQL, PostgreSQL, MongoDB

Cloud and DevOps Tools: AWS, Git, GitHub, Docker, Power BI, Power Query, Microsoft Excel, Vercel, Jupyter Notebook, Google Colab, UiPath

INTERNSHIPS

Machine Learning Intern, Cognify Technologies

January 2026

- Built an SVM-based diabetes prediction model on the 768-sample PIMA Indians dataset, achieving ~78% accuracy after feature scaling and preprocessing..
- Deployed the model as a live Streamlit web app with real-time, probability-based risk prediction and visual risk analysis.

Prompt Engineering Intern, Future Intern

January 2026

- Engineered and deployed a production-grade AI chatbot agent using structured prompt design techniques and agent-based architecture.
- Integrated AI-generated content and video generation capabilities into a prototype e-commerce platform as part of a full-stack development pipeline.

Power BI Intern, Cognify Technologies

January 2025

- Built an interactive Investment Analysis Dashboard in Power BI covering investment avenues, customer demographics, return expectations, and portfolio distribution.
- Created KPI cards, slicers, and drill-through reports to analyze gender, objective, and duration-based investment trends.

Data Analyst Intern, RD Infro Technology

December 2024

- Analyzed Swiggy's year-end operational dataset to evaluate revenue trends, customer segmentation, and key performance indicators across multiple business dimensions.
- Delivered interactive dashboards and structured reports with actionable insights to support data-driven decision-making.

PROJECTS

Semantic Shadow Firewall (SSF) for Large Language Models – Domain: AI and Cybersecurity

- Engineered an Adaptive Self-Healing AI Firewall for securing Large Language Models against semantic prompt-based attacks using Sentence Transformers, FastAPI, and Groq LLM.

- Developed Explainable AI, adaptive threat learning, and an enterprise SOC dashboard for real-time AI security monitoring and threat intelligence.

AI-Based Malware Detection System - Domain: AI and Cybersecurity

- Designed a machine learning-based malware classification system using static and behavioral feature extraction from executable files.
- Applied ensemble learning techniques and evaluated model performance against benchmark malware datasets.

AI-Powered PDF Context-Aware Chatbot (RAG System) - Domain: Artificial Intelligence

- Developed a Retrieval-Augmented Generation (RAG) chatbot capable of answering context-specific queries from uploaded PDF documents.
- Implemented document chunking, vector embedding, and semantic search pipeline to ensure accurate, grounded responses.

AI-Based Business Intelligence Platform - Domain: AI and Data Analytics

- Built a multi-module business intelligence platform integrating AI-driven analytics, automated report generation, and interactive dashboards using Flask and Streamlit.

Customer Segmentation using K-Means Clustering - Domain: Data Analytics

- Applied K-Means clustering on transactional data to identify distinct customer personas and derive actionable marketing insights.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

2023 - Present

Achariya College of Engineering Technology, Puducherry, India

CGPA: 8.50 / 10.00

Higher Secondary Education

2023

Wiseman Hr. Sec. School, Puducherry, India

Percentage: 71%

CERTIFICATIONS

- SOC Level 1 Learning Path, TryHackMe - 14 modules, 65 labs covering Network Forensics, Snort IDS, Splunk, Elastic SIEM, Malware Analysis, and Cyber Threat Intelligence
- Offensive Security Certified Professional, Nativeva
- Certified Cyber Forensics Professional, Nativeva
- AI Security and Pre-Security, TryHackMe
- Advanced Data Visualization using Power BI, GUVI HCL
- Data Analytics, FITA Academy
- Cybersecurity and Privacy, NPTEL
- Prompt Engineering, Pantech Learning
- Automation Developer Associate Training, UiPath

ACHIEVEMENTS AND ACTIVITIES

- Best Performance Award, Training and Placement Cell, Achariya College of Engineering Technology (2025-2026)
- 1st Prize, Inter-School Science Exhibition, Wiseman Hr. Sec. School
- Garnishing Talent Program, Eaton Pvt. Ltd.

LANGUAGES

English, Tamil, Hindi, Bengali, Sourashtra
