PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with internship experience in ML engineering, prompt engineering, and data analytics. Skilled in building end-to-end ML pipelines using Python, FastAPI, and Flask. Passionate about AI-driven cybersecurity with a published SOC project, TryHackMe SOC Level 1 certification, and strong academic performance (CGPA: 8.50/10). Actively seeking Data Analyst, Full-Stack AI Engineer, or SOC Analyst roles.

EDUCATION

B.Tech in Artificial Intelligence and Data Science 2023 – Present

Achariya College of Engineering Technology, Puducherry, India **CGPA: 8.50 / 10.00**

Higher Secondary Education (Bio-Maths) 2023

Wiseman Hr. Sec. School, Puducherry, India **71%**

TECHNICAL SKILLS

AI / ML: Machine Learning, Deep Learning, Generative AI, Prompt Engineering, Federated Learning, NLP, Data Analysis, Data Science

Cybersecurity: AI Security, Malware Analysis, Ethical Hacking, Cyber Forensics, IDS/IPS, SOC Monitoring, SIEM (Splunk, Elastic)

Programming: Python, Bash, SQL

Frameworks & Deployment: Flask, FastAPI, Streamlit, REST API, NumPy, Pandas, Matplotlib, Scikit-learn, Vercel

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: AWS, Git/GitHub, Power BI, Power Query, Excel, VS Code, Jupyter Notebook, Google Colab, UiPath

WORK EXPERIENCE

Machine Learning Intern | Cognify Technologies Jan 2026

- Built logistic regression and random forest models for diabetes prediction, improving accuracy via systematic feature engineering and k-fold cross-validation.
- Preprocessed and analyzed medical datasets, reducing feature dimensionality and improving model generalization on unseen data.

Prompt Engineering Intern | Future Intern Jan 2026

- Engineered and deployed a production-grade AI chatbot agent using structured prompt design techniques and agent-based architecture.
- Integrated AI-generated content and video generation capabilities into a prototype e-commerce platform as part of a full-stack pipeline.

Power BI Intern | Cognify Technologies Jan 2025

- Designed and developed an interactive Investment Analysis Dashboard in Power BI, visualizing key metrics such as investment avenues, customer demographics, return expectations, and portfolio distribution.
- Built KPI cards, slicers, and drill-through reports across 7 structured tasks, enabling multi-dimensional analysis of gender-based trends, objective-based segmentation, and investment duration patterns.

Data Analyst Intern | RD Info Technology Dec 2024

- Analyzed Swiggy's year-end operational dataset to evaluate revenue trends, customer segmentation, and KPIs across multiple business dimensions.
- Delivered interactive dashboards and structured reports with actionable insights to support data-driven decision-making.

PROJECTS

AI Security Operations Center (SOC) – Final Year Project | Domain: AI & Cybersecurity

- Built an LLM-based SOC frontend using Streamlit and FastAPI backend with prompt injection defense, role-based access control, and semantic attack detection.
- Implemented an explainability table for threat records and a real-time threat visualization dashboard.

AI-Based Malware Detection System | Domain: AI & Cybersecurity

- Designed an ML-based malware classification system using static and behavioral feature extraction from executable files.
- Applied ensemble learning techniques and evaluated model performance against benchmark malware datasets.

AI-Powered PDF Context-Aware Chatbot (RAG System) | Domain: Artificial Intelligence

- Developed a Retrieval-Augmented Generation chatbot for context-specific queries from uploaded PDFs.
- Implemented document chunking, vector embedding, and semantic search pipeline for accurate, grounded responses.

AI-Based Business Intelligence Platform | Domain: AI & Data Analytics

- Built a multi-module BI platform integrating AI-driven analytics, automated report generation, and interactive dashboards using Flask and Streamlit.

Multi-Domain AI Resume Analyzer | Domain: Artificial Intelligence

- Created an intelligent resume analysis tool using NLP and scoring heuristics, providing keyword gap analysis and ATS compatibility feedback.

Customer Segmentation using K-Means Clustering | Domain: Data Analytics

- Applied K-Means clustering on transactional data to identify distinct customer personas and derive actionable marketing insights.

CERTIFICATIONS

- SOC Level 1 Learning Path – TryHackMe (14 modules, 65 labs: Network Forensics, Snort IDS, Splunk, Elastic SIEM, Malware Analysis, CTI)
- Offensive Security Certified Professional – Nativeva
- Certified Cyber Forensics Professional – Nativeva
- AI Security & Pre-Security – TryHackMe
- Advanced Data Visualization using Power BI – GUVI HCL
- Data Analytics – FITA Academy
- Cybersecurity & Privacy – NPTEL
- Prompt Engineering – Pantech Learning
- Automation Developer Associate Training – UiPath

ACHIEVEMENTS & ACTIVITIES

- Best Performance Award – Training & Placement Cell, Achariya College of Engineering Technology (2025–2026)
- 1st Prize – Inter-School Science Exhibition, Wiseman Hr. Sec. School
- Garnishing Talent Program – Eaton Pvt. Ltd.
